

## A Healthier Ever After

Healthy Living is a mind set. The choices we repeatedly make become our habits, and improving these habits takes a blend of motivation and education. A Healthier Ever After illustrates for us how each of us can create a mindset of health, learning new lessons from some old friends, a cast of characters borrowed from literary lore. Together they demonstrate how our daily choices sculpt our health and the health of our families and our society. The time to set the right course is now - for yourself, for your loved ones and for society.
