

## To love, love, love harder: The Who, What, When, Why & Where of love

This is a book about different kinds of relationship. It is important to understand that whether it is your first relationship and you are having a hard time understanding your partner or it is your 100th relationship and you still do not get it. Relationships are very difficult because men & women are different. We do not think the same, we do not mentally absorb things the same. Men are visual and hands on. Women are mental and emotional beings. That might sound like it will never work but it will if you are willing to understand each other. The same way you are willing to compromise with your best friend and understand your differences or you know exactly what they like and dislike and are eager to please them. Well, it should be the same way in a relationship. You should want to do everything in your power to make your partner feel at ease. Some relationship are plagued with dishonesty, betrayal and some are a match made in heaven but none are perfect and the key to a great relationship is to work at it. To maintain it as if it were something you worked hard to purchase. An investment, something you earned. Hopefully, you will be able to read this book and understand where you are making mistakes or where you have made mistakes and change your way of being in a relationship. There are pages left blank after each chapter so that you can write your thoughts, things you might want to change or if you feel you are making some great choices. Please enjoy the book and thank you for taking time to read it. It is a great thing to want to grow personally. Lisa Marie Dominguez
