

## Wealth Workbook

This workbook is for you to put into practice the concepts you learned from *Wealth Within Your Reach* and *Making Your Money Work*. It helps you create your own financial plan to better manage your money. It may surprise you to learn that a few basic finance principles are all you need to help you make wiser money decisions. This workbook, again in both English and Tagalog, gives easy-to-understand explanations of the principles and formulas, and allows you to test your understanding by giving examples and exercises with solutions. With this book, you will also learn how to prepare your Statement of Assets and Liabilities (SAL) and Personal Income and Expense Statement (PIES). These statements are necessary as a start for you to understand where you are right now financially, where you want to be in the future, and how you should get there.
