

## Contrail

Australian, Dr George Campbell, and his team have perfected a technique to separate fissionable uranium from ore using lasers. This technique is vastly cheaper and faster than the current centrifuge method and could revolutionize the nuclear industry. He has taken a small team to Europe including his CFO Jennifer Riley and his co- scientist Simon Cantaro, to facilitate funding for the final production stage of the process. To assist their global travel he has hired corporate pilot Geoffrey Lincoln and his corporate crew. Dr Campbells technique also facilitates the production of nuclear weapons and he and his team have come to the notice of a number of countries intelligence agencies, one of which is prepared to go to deadly lengths to obtain the process as the aircraft passengers and crew criss-cross the globe. Geoffrey Lincoln the aircraft captain has to balance the romantic involvement with one of the pursuers with the safety of his passengers and crew A novel of intrigue and romance with an aviation flavour.
