

Dear Spicy_Red42

I don't know one person who gets married, only to get divorced... Yet there I was, taking time to recover from the demise of marriage number two. When I was ready to look for love again, I was excited when a friend suggested that I try online dating. Though this wasn't my first ride on the roller coaster of computer matchmaking, I wished that some guide existed that would help me to pick the best partner online. As keen as I was to start dating again, I'll admit, I was a little nervous. Without a personal cupid to assist me with finding what I hoped would be my last great love, I had to wing it through the process, using trial and error. While this book is not intended to be an official manual about online dating, it is a straight-talking story about my experience while I was dating online. It's full of tales of real-life dates and communications during my quest to find Mr. Right, along with my thoughts about the experience along the way. It's spiked with humor, and I hope you find a few smiles on your face as you enjoy my musings and observations. If my tales help you in some small way, that will be a bonus.
