

# Hindu Achievements in Exact Science: A Study in the History of Scientific Development (Classic Reprint)

The main object of this little book is to furnish some of the chronological links and logical affinities between the scientific investigations of the Hindus and those of the Greeks, Chinese, and Saracens. Details relating to the migration of discoveries have been generally avoided, as they require a treatment more technical than the present scope and space admit. Nor have all the achievements of the Hindus in any branch of science been treated in an exhaustive manner. It has been sought to present a comprehensive, though very brief account of the entire scientific work of ancient and medieval India in the perspective of developments in other lands. From the standpoint of modern science a great part of what is described here is too elementary to have more than an anthropological interest. (Typographical errors above are due to OCR software and do not occur in the book.) About the Publisher Forgotten Books is a publisher of historical writings, such as: Philosophy, Classics, Science, Religion, History, Folklore and Mythology. Forgotten Books Classic Reprint Series utilizes the latest technology to regenerate facsimiles of historically important writings. Careful attention has been made to accurately preserve the original format of each page whilst digitally enhancing the aged text.
