

A History of Education, Before the Middle Ages (Classic Reprint)

The aim has been to present sufficient material to mark the most significant movements, and disclose the underlying principles, without entering into unnecessary detail, or dwelling upon matters but remotely related to the educational problems of to-day. While there has been no attempt to adduce exhaustive proof of the various theses maintained, it is hoped that enough has been presented to make them acceptable for the occasion, and to serve as an interpretative basis of further study. An effort has, moreover, been made to see that all interpretations are based upon historical data collected from the sources; and direct quotation of this material has been liberally made throughout. Also, to supply deficiencies in either facts or interpretation and stimulate the student to research or further reading, references to the sources and to collateral works have been given at the end of each chapter. (Typographical errors above are due to OCR software and do not occur in the book.)
