

The Case of the Pocket Pants

The world is full of those souls who grab a taste of life then find that bite bitter. Or even bittersweet. Their spirit withdraws and they live life in carefully measured strokes. One such soul is Eden McBride, or Eddie as her friends call her, a woman of intellect and good breeding. As a successful writer of romance and intrigue for many years, the truth is that she hasn't found the same adventure in her own life. Various men have pursued her, men who read her books then fall in love with her emerald green eyes and romantic figure. One of the more recent aspiring lovers was Sheik Rahjid Syed Nusrat Amman, a very wealthy Egyptian, whose comments startle Eddie into thinking about her well-ordered life. When the Case of the Pocket Pants arrives on her doorstep, or more accurately, under her dock, Eddie decides that life has had too much precision in it and throws caution into the windy lake. In her attempt to stop counting the number of strokes for brushing her teeth at night, she works on her list of suspects and motives while fighting off another determined admirer, the returned Sheik, and her first husband, Renard. Of all the unexplained incidences on her list, Eddie and her bursts of inspiration are deceived by the most surprising hint of all. Her blind spot. Perhaps more than one blind spot
