

The Little Book of Oneness

This little gem gives you an insight into your true nature that you are one with Source, with God, and that you have never been apart. The book leads you to become aware that you are not just your body. You are so much more. As you progress through the chapters, you discover the importance of the experience of the stillness of the moment. This is the moment, when you have arrived in the center of your heart. It is the all defining moment, when you consciously reconnect with that, which gives rise to all of creation, that which is Source or God. This is your true home. It continues to show you that this is the experience of the Oneness of life and that there are layers of Oneness. On all levels of life you can find the fullness and completeness of consciousness moving within itself, from the individual life to the cosmic life of the universe. And where is all this taking place? It all happens within the point or sphere, and you are at the center of it to experience the point of stillness, the Now, from where all life emerges through surrender. This is a book that needs to be read with your heart. You will also find practical advice on how to get more connected with your heart and your cosmic nature. Practice steps are given for the Heart Exercise and the Golden Earth Blessing. Once you have read this book you have gained a glimpse of your true home. It will set you on a journey to bring this aspect into your daily life, to love the Oneness of life that is yourself.
