Techniques - Instant, Quick and Deep We
all experience anxiety and depression some
time or the other in our lives. It is a normal
helpful reaction to stressfully demanding
situations and is one of the several
emotions that we experience in our lives in
response to situations. It adversely affects
the work and mental health when it occurs
too often and lasts too long. Depression
and Anxiety take on the form of a disease
when they affect you for months and
disturb the quality of life when it becomes
mandatory to seek medical help. The
number of people suffering from anxiety
and depression is on the increase and has
become a common problem of modern
progressive affluent society.
